Dear Farm Market Vendor:

The seasonal retail foods sold at the farm market stands need to be safe for consumption by the public. The following lists and definitions should answer questions concerning what can and cannot be sold.

Raw agricultural products may be sold. These products are defined as: produce, honey and maple syrup. The raw agricultural products do not need a permit from the Health Permit.

The following products may be sold but **need to be properly licensed and prepared in a properly licensed facility** as they are regulated by law:

- Bread
- Home bakery products
- Processed foods: jams, jellies, or any canned foods.
- Beef or pork
- Seafood
- Cheese

- Homemade candy
- Live animals
- Poultry
- Wild Mushrooms
- Eggs

If you sell the above products you must be permitted by the Tippecanoe County Health Department.

If you have any questions please feel free to contact me at Tippecanoe County Health Department at (765) 423-9221 ext. 3. I trust that with your cooperation the Farmers' Market can provide safe and healthy food to the residents of Tippecanoe County.

Thank you,

Melissa Culver-Pekny Environmental Health Specialist Tippecanoe County Health Department Megan Pitcher Foods Division Intern Tippecanoe County Health Department
